PROFESSIONAL SUMMARY

Full Stack Developer with foundational MERN stack knowledge, actively improving problem-solving skills (500+ DSA problems) and building web applications while continuing to learn scalable development practices. Seeking a growth-oriented opportunity to apply and expand technical abilities.

EDUCATION

Southeast University

Bachelor of Science in Computer Science and Engineering CGPA: **3.83**

Dhaka, Bangladesh

February 2022 – February 2026

Skills

- **Languages:** C, C++, Java, Python, PHP.
- **Frontend:** HTML, CSS, Tailwind CSS, React
- **Backend:** Node.js, Express.js
- **Database:** SQL (MySQL), MongoDB.
- **Tools:** Git, GitHub, VS Code, CP editor.
- **Core Concepts:** OOP, Data Structures & Algorithms, REST APIs, WebSocket

Projects

Hotel Booking System [HTML, CSS, JS, PHP, MySQL]

[Source Code](#)

- Developed responsive hotel booking application with real-time room availability tracking and comprehensive booking management system
- Implemented secure user authentication with encrypted password storage, email verification, and session management
- Designed intuitive, user-centric UI/UX interface to improve engagement and enhance overall user experience
- Architected relational database with proper schema normalization, strategic indexing, and validation rules ensuring data integrity

EbUy [Node.js, Express.js, React, MongoDB]

[Source Code](#)

- Architected and deployed full-stack e-commerce platform using MERN stack
- Implemented JWT authentication with email verification and bcrypt password hashing
- Built 7+ RESTful API endpoints with input validation and rate limiting
- Designed MongoDB schema with proper relationships and indexing
- Integrated Multer for secure file uploads and Nodemailer for email workflows
- Developed React frontend with real-time cart updates and client-side routing
- Applied security best practices: XSS protection, input sanitization, CORS configuration
- Built search/pagination functionality for efficient data browsing

Bloggy [EJS, Node.js, Express.js, Tailwind, MongoDB]

[Source Code](#)

- Developed a full-stack blogging platform enabling users to create accounts, publish posts, and interact through likes
- Built backend using Node.js and Express.js with MongoDB for efficient data management
- Implemented secure authentication using JWT (JSON Web Token)
- Designed real-time post feed system to enhance user engagement and content visibility
- Developed customizable user profiles with profile picture upload functionality
- Integrated community engagement features including commenting and interaction system

- Developed a full-stack e-commerce application using Node.js, Express.js, and MongoDB
- Implemented secure authentication system with JWT and bcrypt password hashing
- Designed RESTful API endpoints for user management, product catalog, shopping cart and owner dashboard
- Integrated file upload functionality with Multer for product image management
- Implemented session management and flash messaging for enhanced user experience

Achievements and Problem-Solving Experience

Achievements:

- **Ranked 128th: 2023 ICPC Asia Dhaka Regional Onsite Contest – SEU_SPARTAN**
- **Ranked 3rd: Intra University Programming Contest 2022, Southeast University – Solo**
- **Ranked 3rd: 2024 ICPC Asia Dhaka Regional Preliminary Contest – SEU_SPARTAN**

Problem Solving Experience:

- Total problem solved across all judges: 500+

Extra Curricular Activities

- | | |
|---|--------------------------------------|
| • Department Coordinator - Southeast Games & Sports Club | <i>August 2023 - August 2024</i> |
| • Trainer - C & C++ Language at Southeast Computer Club | <i>February 2023 – February 2024</i> |
